Vocational Information Technology - Pearson BTEC Level 1

Programme Outline:

The Level 1 Introductory Vocational Studies in IT is a coursework-based qualification, designed to give students a broad introduction to information technology. It provides practical opportunities to develop essential IT skills, including using software applications, understanding digital systems, and completing projects that reflect real-world scenarios.

The course is offered as an Award, Certificate, or Diploma, allowing students to study a number of units depending on the size of the qualification.

Mandatory units include:

- Researching a Topic
- Working With Others

Optional units include:

- Creating a Spreadsheet to Solve Problems
- Designing an Interactive Presentation
- Communicating with Customers
- Recording Income and Expenditure
- Using Digital Communication Technology
- Creating a Website

As this qualification is assessed entirely through coursework, students can build confidence in their abilities at their own pace, without formal exams. It supports progression to Level 2 qualifications in IT, further study, or entry-level roles in the digital and technology sector.
